EVERLIGHT

DATASHEET

SMD • B 11-22/BHY2C-A01/2T

Features

- Package in 8mm tape on 7" diameter reel.
- Compatible with automatic placement equipment.
- Compatible with infrared and vapor phase reflow solder process.
- Mono-color type.
- Pb-free.
- The product itself will remain within RoHS compliant version.
- Compliance with EU REACH
- Compliance Halogen Free .(Br <900 ppm ,Cl <900 ppm , Br+Cl < 1500 ppm).

Description

- The 11-22 SMD LED is much smaller than lead frame type components, thus enable smaller board size, hiBHer packing density, reduced storage space and finally smaller equipment to be obtained.
- Besides, liBHtweiBHt makes them ideal for miniature applications. etc.

Applications

- BackliBHting in dashboard and switch.
- Telecommunication: indicator and backliBHting in telephone and fax.
- Flat backliBHt for LCD, switch and symbol.
- General use.

Device Selection Guide

Code	Chip Materials	Emitted Color	Resin Color
BH	InGaN	Blue	Water Class
Y2	AlGaInP	Brilliant Yellow	- Water Clear

Absolute Maximum Ratings (Ta=25℃)

Parameter	Symbol	Code	Rating	Unit	
Reverse Voltage	V _R		5	V	
Forward Current	l _F	ВН	25		
		Y2	25	— mA	
eak Forward Current (Duty 1/10 @1KHz)	I _{FP}	ВН	100		
		Y2	60	— mA	
Power Dissipation	Pd	вн	95		
		Y2	60	— mW	
Electrostatic Discharge	ESD _{HBM}	ВН	150		
		Y2	2000	— V	
Operating Temperature	T _{opr}		-40 ~ +85	°C	
Storage Temperature	Tstg		-40 ~ +90	°C	
Soldering Temperature	Tsol		Reflow Soldering : 260 $^\circ C$ for 10 sec. Hand Soldering : 350 $^\circ C$ for 3 sec.		

Electro-Optical Characteristics (Ta=25°C)

Parameter	Symbol	Code	Min.	Тур.	Max.	Unit	Condition
Luminous Intensity	lv	BH	112	140		- mcd deg	
		Y2	140	170			
Viewing Angle	20 _{1/2}			60			
Peak Wavelength	λр	BH		468		- nm	 I _F =20mA
		Y2		591			
Dominant Wavelength	λd	ВН	465		470	- nm	
		Y2	585		595		
Spectrum Radiation Bandwidth	Δλ	ВН		25		- nm	
		Y2		15			
Forward Voltage	V _F	ВН	2.7		3.4	- V	
		Y2	1.7		2.4		
Reverse Current	I _R	BH			50	– μΑ	V _R =5V
		Y2			10		

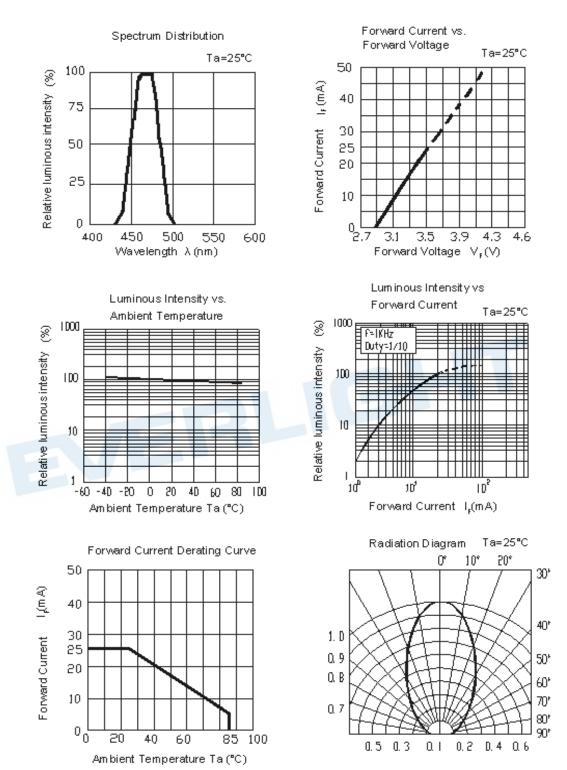

Note:

1.Tolerance of Luminous Intensity: ±11%

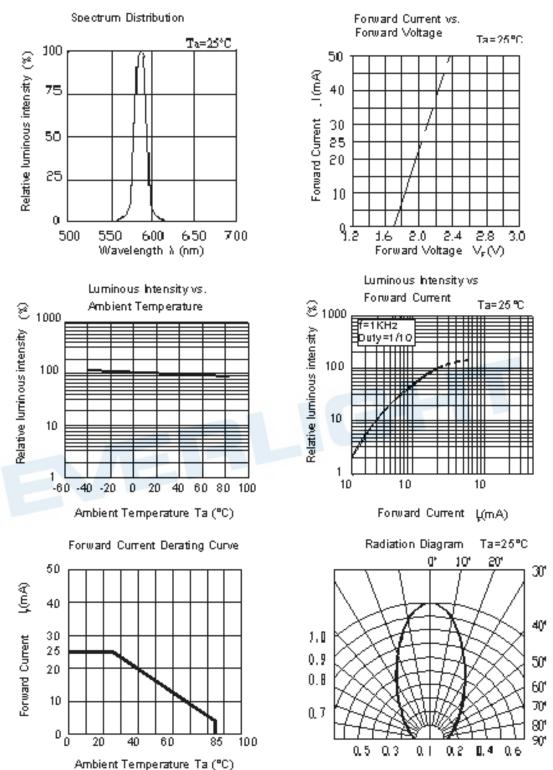

2. Tolerance of Dominant Wavelength ±1nm

3. Tolerance of Forward Voltage $\pm 0.1V$

Package Dimension

Note: Tolerances unless mentioned ±0.1mm. Unit = mm

EVERLIGHT

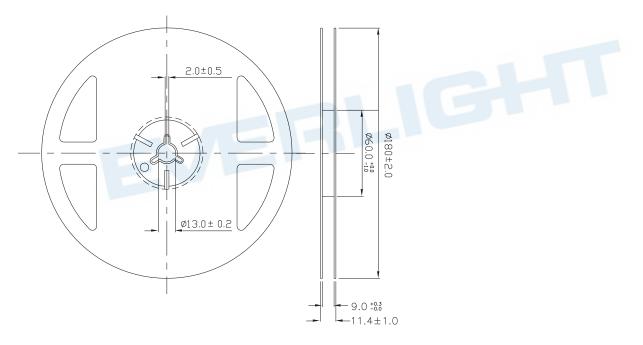

Label Explanation

CPN: Customer's Product Number

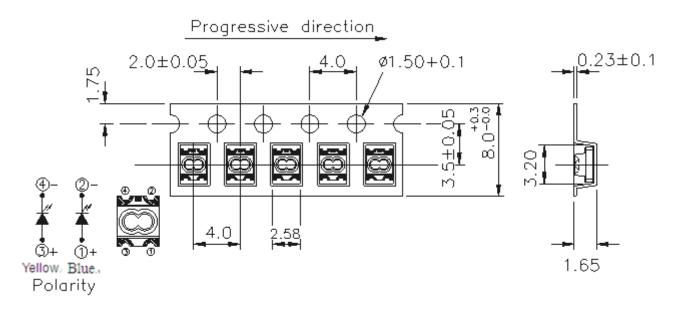

- P/N: Product Number
- QTY: Packing Quantity
- $\boldsymbol{\cdot}$ CAT: Luminous Intensity Rank
- HUE: Chromaticity Coordinates & Dom. Wavelength Rank
- REF: Forward Voltage Rank
- LOT No: Lot Number

Reel Dimensions

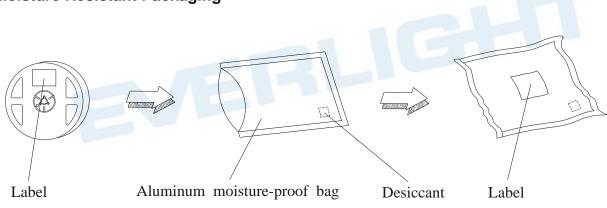

Note: The tolerances unless mentioned is ± 0.1 mm ,Unit = mm

Carrier Tape Dimensions: Loaded quantity 2000 PCS per reel

Note: The tolerances unless mentioned is ± 0.1 mm ,Unit = mm

Moisture Resistant Packaging

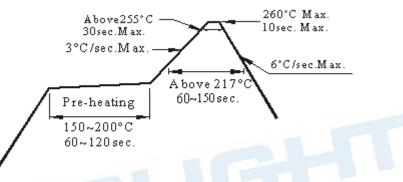

Precautions For Use

1. Over-current-proof

Customer must apply resistors for protection, otherwise sliBHt voltage shift will cause big current change (Burn out will happen).

- 2. Storage
- 2.1 Do not open moisture proof bag before the products are ready to use.
- 2.2 After opening the package: The LEDs should be kept at 30 $^\circ\!C$ $\,$ or less and 60%RH or less.
- 2.3 The LEDs should be used within 168 hours (7days) after opening the package .
- If unused LEDs remain, it should be stored in moisture proof packages.
- 2.4 If the moisture absorbent material (silica gel) has faded away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions. Baking treatment : 60±5℃ for 24 hours.
- 3. Soldering Condition
- 3.1 Pb-free solder temperature profile

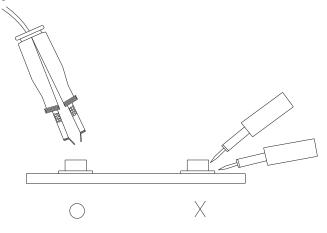

- 3.2 Reflow soldering should not be done more than two times.
- 3.3 When soldering, do not put stress on the LEDs during heating.
- 3.4 After soldering, do not warp the circuit board.

4.Soldering Iron

Each terminal is to go to the tip of soldering iron temperature less than 350° C for 3 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

5.Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

Application Restrictions

HiBH reliability applications such as military/aerospace, automotive safety/security systems, and medical equipment may require different product. If you have any concerns, please contact EverliBHt before using this product in your application. This specification guarantees the quality and performance of the product as an individual component. Do not use this product beyond the specification described in this document.
